2019 - 2023 (expected graduation)

### Languages

- Greek (Native)
- English (Professional)
- Japanese (Beginner)

### Interests

- Programming
- Gaming
- Drawing

## About me

I have worked as a freelance programmer for 2 years, helping my parents by creating websites for their job's appointment schedule(online appointment). As for gaming it's just a free-time hobby nothing special, I prefer web design and databases than game design, but you never know. Drawing is another hobby of mine I mostly like comics cause I can create characters and stories. As a character I'm not the person who can concentrate on a work for long time, that's why I prefer to make schedules about my work for each day.

## Experiences

### Freelance Programmer

2021 - Present

I work on random projects as a freelance programmer. I work from home and I create sites to help relatives organise their customers.

- Programming
- Web

## Projects

I don't have special projects that I spend my time right now. But, I enjoy working on new things. When, I have free time I like working on projects that will help me improve my knowledge

Program for every month - You can find the first template in one of my github repositories. It's a system that people can book an appointment and inform the admin

## Publications

I don't have any publications.
